

Найдите среднюю точку в каждой группе координат.

Фórmula de punto medio

$$\frac{x_1 + x_2}{2}, \frac{y_1 + y_2}{2}$$

Para encontrar el punto medio de las coordenadas (4,5) y (8,1), sustituya los valores en la fórmula del punto medio.

$$\frac{4 + 8}{2}, \frac{5 + 1}{2}$$

El punto medio está en (6,3).
